

Divisions, products & features

Build the product catalog that projects and workflows depend on. All catalog admin lives under **Settings**, not Admin.

Step 1

Catalog hierarchy

- **Division** – top-level business unit (e.g. Strata AI, Strata Protect).
- **Product** – equipment type (e.g. AIM-100, HA-Coal); optionally assigned to a division.
- **Feature** – reusable parts/components in the global library; linked to one or more products.
- **Workflow Type** – category label (Installation, Inspection, Commissioning) used when publishing workflows.

Settings tabs: ?tab=divisions, ?tab=products, ?tab=features, ?tab=workflow-types

Step 2

Create a division

1. Sidebar → **Settings** → **Divisions** tab.
2. Click **Add division**.
3. Enter **Name** (required), optional **Description**, and **Sort Order**.
4. Save — division appears as **Active** in the table.

Settings — Divisions

Manage top-level business divisions (e.g. Strata AI, Strata Connect, Strata Protect).

Name	Description	Status
Strata AI	AI monitoring products	Active
Strata Protect	Chamber & refuge systems	Active

Step 3

Create a product

1. Settings → **Products** tab (?tab=products).
2. Click **Add product**.
3. Enter **Name** (e.g. *AIM-100 Camera*), optional description.
4. Select a **Division** or leave as *No division*.
5. Save — product appears in the catalog table.

Add product

HA-Coal Controller

Description (optional)

HazardAvert coal zone controller

Division

Strata Protect

Step 4

Build the feature library

1. Settings → **Features** tab.
2. Click **Add feature** (or **Import** from CSV/Excel).
3. Set **Name / Part Number**, **Type** (text, number, component, etc.).
4. Mark as **Inventory item** or **Non-inventory**.
5. For inventory items, configure capture fields (serial, firmware, IP, etc.).
6. Optionally link to products at creation time.

Feature Library

Search

Search name, brand, supplier, part #...

Name	Type	Inventory	Products
Zone Controller Module	component	Inventory	HA-Coal
RF Antenna	component	Inventory	HA-Coal
Pre-install checklist	text	Non-inventory	—

Step 5

Link features to products

1. In Settings → Products, expand a product row.
2. Section **LINKED FEATURES (N)** shows current links.
3. Click **Link feature** and pick from the global library.
4. Remove a link via the chip delete control on a linked feature.
5. Features can also show linked products in the Features tab **Products** column.

HA-Coal Controller — LINKED FEATURES (3)

Zone Controller Module × RF Antenna × Power Supply ×

Dependencies (sub-parts per feature) are configured by expanding a feature row → **DEPENDENCIES** → **Add dependency**.

Step 6

Workflow types

1. Settings → **Workflow Types** tab.
2. Click **Add type**.
3. Enter **Name** (Installation, Inspection, Commissioning), **Icon**, **Sort Order**.
4. Types appear in the workflow create/publish dialogs as **Workflow Type**.

Name	Sort	Status
Installation	1	Active
Inspection	2	Active
Commissioning	3	Active

Step 7

How the catalog feeds workflows & projects

- **Projects** pick one primary **Product name** — determines which workflow tab and asset configuration apply.
- **Workflows** (/work-instructions?product=...) are scoped per product; linked features drive BOM and capture fields in the builder.
- **Workflow Type** from Settings labels each published workflow (Installation vs Inspection).
